TREE 2020 / 2021

SHARED EXPERIENCE

Courant is a family owned rope manufacturing company passed down from generation to generation, where our knowledge and expertise goes back almost 200 years. In order to offer great quality ropes, we have developed and constructed different inhouse testing machines to reproduce the conditions found in actual work environments. All ropes must pass rigorous test procedures to ensure that each user gets the most effective and durable rope for his specific use.

Our R&D team consists of highly experienced and innovative individuals working to meet the constantly evolving requirements of the arborist, access & rescue industry. Therefore they are considered to be the actual heart of the rope manufacturing process within our company.

WE BUILD CONNECTIONS WITH PEOPLE WORKING ON ROPES

In the last few years we have developed a full range of tree climbing equipment for the professional arborist, combining high levels of functionality, comfort and durability. Following this we started working with a determined group of international ambassadors and product testers who assisted us in the development process, to make sure each product meets (or preferably exceeds) the expectations of the market.

All this hasn't gone unnoticed by worldwide users, reflected by increasing demand from Arb suppliers all over the globe. At Courant we are fully committed to further expand our business in the next few years, by forging long term relationships with the right people, who like us; are passionate about building connections and supplying the best tree climbing equipment.

Nicolas COURANT
7th generation owner & MD Courant

USERS ARE **KEY** IN
OUR DEVELOPMENT
PROCESS

MEETIC TECHNOLOGY

The patented Meetic Technology creates a real connection between the core and the sheath of a rope for 'ultimate' safety! It allows a safe escape in worse case scenarios and/or severe sheath damage. Using heat treatment we can 100% eliminate the use of glue so our rope will not lose its flexibility over time.

X-BRAID

Each rope core consists of multiple braided cores instead of the more commonly used core with twisted strands of yarn. The X-Braid Technology ensures a long-lasting flexibility to all the ropes carrying this specific marking.

MADE IN FRANCE

A few kilometres away from the original 19th century rope production location, our ropes are 100% made in Angers, Loire valley, France!

COURANT LEMON LAB

Creating remarkable ropes is a much tougher job than just producing ropes which meet the standards. Recently our R&D team have developed and constructed a rope testing machine to imitate the rope behavior during heavy use in tough environments. This allows us to reproduce the actual wear on a rope and the results from these tests are used in the development process. Which finally leads to a more wear resistant rope while keeping its suppleness and flexibility.

COURANTS STRENGTHS

COURANT GIVING BACK

KOALA : AUSTRALIA

When we saw the ecological devastation caused by the Australian bush fires, we wanted to help. The company management decided to donate a portion of the profits from the sale of our Koala harness in 2020. This money goes towards the rehabilitation of the animals who have survived these terrible fires, and also towards the reconstruction of the devastated areas.

VIRADES DE L'ESPOIR

The Virades de l'Espoir is a national event organized by volunteers to promote public awareness and to fundraise for the cystic fibrosis association. This event has run for over 30 years. Courant have been supporting this cause for the past 4 years by providing a climbing wall for their annual event.

PINK DRAGON LADIES

The Pink Dragon Ladies are survivors of breast cancer who have come together to crew the Dragon boat. Through this group they not only are physically active, but they also have a solidarity and shared unity in their fight against cancer. We have supported these fantastic ladies for several years.

HARNESS KOALA

KOALA

COMFORTABLE & LIGHTWEIGHT

When you want comfort but won't compromise on features or functionality the Koala is the harness for you. The waist and leg padding are manufactured from a blend of foams, which offer unrivalled comfort and excellent breathability. This easy to adjust harness has been designed for maximum performance in the trees and comes in 3 sizes to fit each individual.

KEY FEATURES

- Available in 3 sizes; S, M/L and L/XL
- Improved leg padding for increased comfort
- Upgraded attachment bridge with wear indicator
- New chest harness can be added to comfortably carry heavy chainsaws

OTHER FEATURES

- No compromise between lightness and comfort
- Austri-Alpin stainless steel Cobra® buckles
- Openable rings to allow bridge replacement
- Rapid adjustment for instant comfort
- Generous number of gear loops
- Extra loop on the rear to accommodate the chest harness

Size S

- Waist: 60cm - 100cm
- Thigh: 55cm - 85cm
- Weight: 1.5kg

Reference: RELOHRS+

Size M/L

- Waist: 75cm - 105cm
- Thigh: 60cm - 50cm
- Weight: 1.6kg

Reference: RELOHRML+

Size L/XL

- Waist: 95cm - 120cm
- Thigh: 70cm - 102cm
- Weight: 1.7kg

Certification: CE EN358 & EN813

ODIN

A KING'S TOOL

After 3 years of constant fine tuning we are proud to announce the new version of the Olik openable ring which answers to the name; Odin! It is made from high resistant stainless steel and the size and certification allows the connection of a large number of pieces of equipment in different sizes and setups. It opens like a normal karabiner but in a sideways direction, and together with the specially designed keylock gate it assures minimal force is applied to the locking screw. The screw has a spring ball system with a thread lock to securely fix the gate before use.

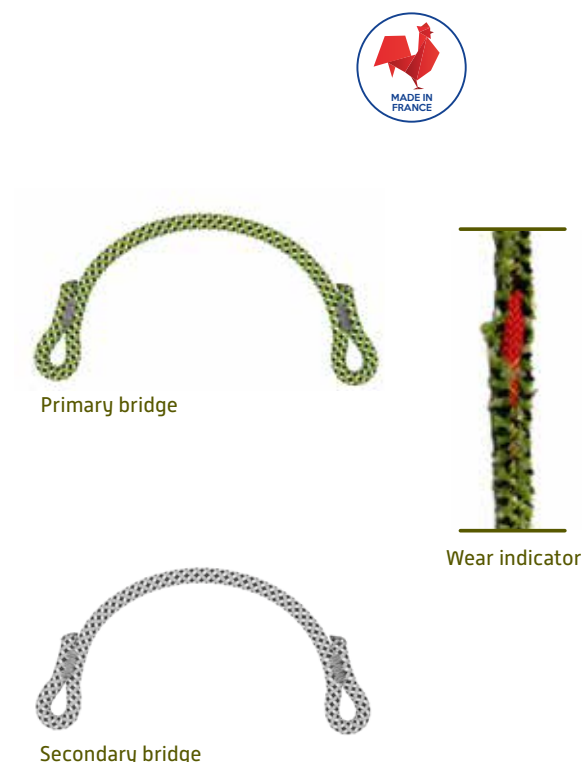

Certification: CE EN362

- Outside diameter: 75mm
- Inside diameter: 47mm
- Gate opening: 18mm
- Weight: 130gram
- Static resistance: 25kN

CLIMBING
HARNESS

HARNESS ACCESSORIES

KOALA CHEST

TAKE A LOAD OFF

The new chest harness is manufactured from perforated foam and soft fabrics which make it very comfortable and highly breathable. It helps to redistribute the weight of heavy tools and increase comfort while climbing. The different loops facilitate the attachment of equipment, accessories or your SRT climbing system. Three karabiners attach the chest to the Koala harness and four adjustment points will give you an optimum fit. The Koala chest is also compatible with other climbing harnesses currently on the market.

Reference: RELOTHKA

One size fits all

- Colour: black / green
- Dimensions: 490mm x 565mm
- Weight: 0.7kg

MILLO

BUILDING BRIDGES

The bridge gets more wear than any other part of a climbing harness, therefore we decided to increase the diameter of our bridge and incorporate a red wear indicator. This unique feature alerts you when it is time to replace your bridge. It is available in three lengths and two colour combinations for easy recognition of the primary and secondary bridge.

SK8

TAKE A SEAT MY FRIEND

The SK8 is a Canadian built compact and lightweight shaped maple wood seat, which comes in 2 sizes. It is quick and easy to attach to the Koala harness, but also compatible with most arborist harnesses currently on the market. Its design and lightness make the seat very comfortable to use and doesn't impair your movement through the trees. Three gear loops allow tools to be attached to the underside.

Size M/L

- Length: 49cm
- Width: 14cm
- Weight: 450gram

Honos S

Honos L

HONOS

CARRY YOUR FAVORITE TOOLS

Our new Honos tool holder has been developed in close cooperation with professional Arborists. It is lightweight but tough and strong enough to carry a chainsaw. By incorporating a locking system, the Honos is designed to stay securely in place on your harness. Available in two different sizes and three eye catching colours, they are sure to stand out.

KEY FEATURES

Size L

- Excellent stability on the harness thanks to the spring lock
- Locking mechanism on the gate prevents accidental opening

- Connection hole at the bottom to connect your chainsaw lanyard
- Size S**
- Secured to the harness by two opposing hooks

Size L

- Length: 150mm
- Width: 93mm
- Gate opening: 42mm
- Weight: 82gram
- WLL: 15kg

Size L

FIRST AID KIT

This kit is both lightweight and compact and contains all the essentials you will need to effectively deal with an emergency while working in the trees. The kit is designed to be mounted onto the Koala harness, but it is also compatible with other climbing harnesses. All the loose items are attached to the kit bag by an elasticated cord, ensuring nothing falls to the ground when you need it most.

Contents

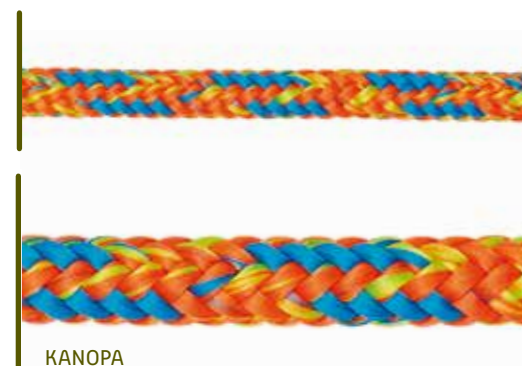

- Haemostatic dressing
- Trauma shears
- Tourniquet
- Felt pen

CLIMBING ROPES

KANOPA

KOMORA

KANOPA

DON'T CHANGE A GOOD RECIPE

Developed back in 2009 the Kanopa quickly became the most popular 16-strand climbing rope used by French arborists and it is still widely used today. This 12.1mm diameter rope utilises the X-Braid parallel core technology which gives it its long-lasting flexibility, where this construction guarantees almost zero core-sheath slippage. In 2019 we introduced a new vibrant colour combination to further enhance its visibility in the trees. Available in different lengths with one or two eye splices.

- Diameter: 12.1mm
- Materials / construction: 16-strand Polyester sheath with X-Braid Polyamide core
- Static resistance: 31kN
- Resistance with spliced eye: 23.5kN
- Mass per meter: 103gram
- Sheath percentage: 67%
- Sheath slippage: 0.4%
- Elongation 50 / 150Kg: 2.4%
- Knotability: 0.87
- Retraction with water: 2.8%

Reference: MHF++BZ++++

Certification: CE EN1891-A

KOMORA

DARWIN WAS RIGHT ABOUT EVOLUTION

Take the DNA of the Kanopa and let it mutate for a decade... the end result, our new 11.7mm Komora 16-strand climbing rope! This rope has been designed using the very latest innovations in rope manufacturing. Its updated sheath gives superior abrasion resistance and it feeds very smoothly through all popular mechanical friction devices on the market. Like the Kanopa the core is constructed of X-Braid parallel core technology, it comes with a new slim eye splice which can be easily pulled through mechanical friction devices, and it also features the Courant patented in-eye labelling. Available in different lengths with one or two eye splices.

- Diameter: 11.7mm
- Materials / construction: 16-strand Polyester sheath with X-Braid Polyamide core
- Static resistance: 30kN
- Resistance with spliced eye: 19kN
- Mass per meter: 94gram
- Sheath percentage: 67%
- Sheath slippage: 0%
- Elongation 50 / 150Kg: 2.7%
- Knotability: 0.8
- Retraction with water: 2.7%

Reference: MJF++CZ++++

Certification: CE EN1891-A

CLIMBING
ROPES

JAPORA

OZORA

JAPORA

SOFTNESS IS NOT WEAKNESS

The first 24-strand double braid arborist climbing rope by Courant. Introduced in 2017 and featuring the Courant patented in-eye labelling. The soft feel, good grip and great knot-ability of this 11.5mm diameter rope makes it a very popular choice for many climbers. The ultra slim eye splice can be easily pulled through modern mechanical friction devices. Available in different lengths with one or two eye splices.

- Diameter: 11.5mm
- Materials / construction: 24-strand Polyester sheath with braided Polyamide core
- Static resistance: 23.8kN
- Resistance with spliced eye: 20kN
- Mass per meter: 93gram
- Sheath percentage: 59%
- Sheath slippage: 0%
- Elongation 50 / 150Kg: 3.5%
- Knotability: 0.58
- Retraction with water: 1%

Reference: MJT++JFC+++

Certification: CE EN1891-A

OZORA

THE BIG EASY

Sharing the same 24-strand double braid construction as the Japora, the Ozora is only 1mm bigger in diameter (12.5mm). Suited to climbers with slightly larger hands and searching for the ultimate grip on a soft and flexible rope. Available with the patented in-eye labelling system and a slim eye splice. The Ozora is also compatible with different feedthrough mechanical friction devices. Available in different lengths with one or two eye splices.

- Diameter: 12.5mm
- Materials / construction: 24-strand Polyester sheath with braided Polyamide core
- Static resistance: 26kN
- Resistance with spliced eye: 22kN
- Mass per meter: 109gram
- Sheath percentage: 63%
- Sheath slippage: 0%
- Elongation 50 / 150Kg: 3.6%
- Knotability: 0.6
- Retraction with water: 1.2%

ACCESS ROPES

SQUIR

EXTREMA

SQUIR

PUT A WRENCH ON IT

Designed especially for SRT and/or use as an access line, we have re-developed our low stretch 32-strand 11.5mm diameter Squir rope with a more durable but still flexible sheath. Its low stretch (less than 2% elongation) ensures that the bounce effect is kept to a minimum when ascending the tree. The rope is heat treated in the factory for greater stability, and the sheath protects against wear from sharp toothed cam ascenders. The Squir retains its roundness while descending.

Available in different lengths and because of the low stretch it is not possible to supply with eye splices or stitched eyes.

- Diameter: 11.5mm
- Materials / construction: 32-strand Polyester sheath with X-Braid Polyamide core
- Static resistance: 30kN
- Resistance with figure of 8 knot: 21kN
- Mass per meter: 91gram
- Sheath percentage: 43%
- Sheath slippage: 0.2%
- Elongation 50 / 150Kg: 2%
- Knotability: 0.74
- Retraction with water: 1.5%

Yellow MJ100JZC+++

Certification: CE EN1891-A

EXTREMA

NEW GAME, NEW FAME

We have updated one of our former best-selling 32-strand caving & speleology ropes called the Equirial. We mainly reduced the stretch, gave it a modern style and a high visibility colour combination...and on top of that a far better international name to gain new appeal to a wide audience of rope access enthusiasts! The improved stretch of the Extrema is a huge benefit on jobs requiring long lengths of working rope, where the proven (it was already inside the Equirial rope) X-Braid parallel core technology gives the rope its long lasting flexibility. Available in different lengths with one or two stitched eyes.

- 10.5mm
- Materials / construction: 32-strand Polyamide sheath with X-Braid Polyamide core
 - Static resistance: 32kN
 - Resistance with stitched eye: 23kN
 - Mass per meter: 69gram
 - Sheath percentage: 41%
 - Sheath slippage: 0.2%
 - Elongation 50 / 150Kg: 2.5%
 - Knotability: 0.63
 - Retraction with water: 4.5%

PHOENIX

CLOSE YOUR EYES AND MAKE A HITCH

The Phoenix has been developed for tying different kinds of hitches and works as the perfect brake on arborist climbing ropes. The sheath of this cord is manufactured from the latest generation aramid fibres which are highly resistant to heat, wear and UV radiation. The Phoenix is available in 8mm or 10mm diameter as a lanyard with 2 stitched eyes from 65cm up to 110cm, and for different applications we also have the Phoenix available in 100 & 200m rope boxes. At the start of 2020 we replaced the traditional heat shrink tube with a molded polymer end protector as a finishing touch.

Certification: CE EN795-B (only as a lanyard)

- Diameter: 8mm & 10mm
- Materials: Polyamide / Polyester / Aramid
- Colour: green / black
- Static resistance: 8mm - 18kN / 10mm - 22kN
- Resistance with stitched eyes: 8mm - 12.5kN / 10mm - 18kN

WIRE CORE LANYARDS

STILEO WIRE CORE LANYARD

This 12mm diameter adjustable wire core lanyard is especially developed for tree removal operations. The robust 16-strand polyester sheath (same construction as the Kanopa) gives the Stileo a comfortable grip, and the special 6mm stainless steel wire core gives it its remarkable flexibility. The direction of use is reversible to ensure even wear, and if necessary the lanyard can be fully replaced thanks to the easy removable metal adjuster. Available in 3 lengths with different hardware options.

- Gate opening: 18mm
- Weight: 130gram
- Static resistance: 25kN

Reference RMQXANOD

SNAPO

SNAPO

Courant by ISC aluminium captive eye snap hook designed for use on the end of a lanyard. The triple lock gate is easy to operate single handedly.

Certification CE EN362

- Length: 141mm
- Width: 70mm
- Gate opening: 22mm
- Weight: 134gram
- Static resistance: 27kN

Reference: RMQIH903A

GECKO

ISC aluminium medium size triple lock karabiner.

Certification CE EN362

- Length: 115mm
- Width: 75mm
- Gate opening: 21mm
- Weight: 86gram
- Static resistance: 25kN

Reference: RMQI02BK

SNAPO TWIST

SNAPO TWIST

Courant by ISC aluminium triple lock snap hook with a swivel and specially designed for use at the end of a reinforced lanyard.

Certification CE EN362

- Length: 195mm
- Width: 70mm
- Gate opening: 22mm
- Weight: 198gram
- Static resistance: 27kN

Reference: RMQIH905A

GATOR

ISC aluminium small size triple lock karabiner.

Certification CE EN362

- Length: 105mm
- Width: 65mm
- Gate opening: 15mm
- Weight: 47gram
- Static resistance: 25kN

Reference: RMQI01BK

CORE

Courant steel D-shape triple lock karabiner with large opening.

Certification CE EN362

- Length: 128mm
- Width: 71mm
- Gate opening: 31mm
- Weight: 321gram
- Static resistance: 60kN

Reference: RMQU2198

VICTO

Courant steel HMS triple lock karabiner. Ideal for anchoring and rigging.

Certification CE EN362

- Length: 110mm
- Width: 67mm
- Gate opening: 21mm
- Weight: 234gram
- Static resistance: 50kN

Reference: RMQU5958

VECTOR TL

Courant aluminium HMS triple lock karabiner with large opening.

Certification CE EN362

- Length: 113mm
- Width: 74mm
- Gate opening: 23mm
- Weight: 97gram
- Static resistance: 22kN

Reference: RMQK786CA

Open

Closed

AXXIS

Courant Zicral (zinc aluminium alloy) oval screw gate karabiner. It is fitted with a locked indicator.

Certification CE EN362

- Length: 110mm
- Width: 62mm
- Gate opening: 21mm
- Weight: 75gram
- Static resistance: 24kN

Reference: PPLSMQSY

AXXIS TL

Courant Zicral (zinc aluminium alloy) oval triple lock karabiner.

Certification CE EN362

- Length: 110mm
- Width: 62mm
- Gate opening: 21mm
- Weight: 82gram
- Static resistance: 24kN

Reference: RMQUAXTL

MOKA

Courant aluminium delta-ring shape triple lock karabiner. It is strong, light, easy to use and connects the two chest attachment points of a full body harness. It is specifically designed to allow the rope or webbing loop to positioning itself in the correct orientation.

Certification CE EN362

- Length: 113.5mm
- Width: 75mm
- Gate opening: 18mm
- Weight: 130gram
- Static resistance: 20kN

Reference: RMQCMOKA

ORBIT 22

Courant aluminium pulley with fixed side plates.

Certification CE EN12278

- Length: 85mm
- Width: 44mm
- Weight: 85gram
- Static resistance: 22kN
- Maximum rope diameter: 13mm

Reference: PPLSPLJF

MOVA

Courant aluminium pulley with rotating side plates.

Certification CE EN12278

- Length: 73mm
- Width: 43mm
- Weight: 85gram
- Static resistance: 20kN
- Maximum rope diameter: 11mm

Reference: RPL92142

PHLOTICH PULLEY

This Courant by ISC aluminium pulley is ideally suited for SRT and DRT climbing techniques in numerous configurations. The unique kidney shaped design allows karabiners to self-center according to where the load is applied. The holes are large enough for a karabiner to completely rotate and also reduce the risk of side loading. The two rotating side plates are colour coded to easily identify the orientation of the pulley.

Certification CE EN12278

- Length: 97mm
- Width: 69mm
- Weight: 145gram
- Static resistance: 32kN
- Maximum rope diameter: 13mm

Reference: RPLIP282FL

ROPE WRENCH KIT

The ISC Rope Wrench is an aluminium friction device that allows the climber to ascend, descend and work in the tree using SRT climbing techniques. It allows the climber to smoothly control the rate of descent by adding friction onto the climbing system. A rigid tether enables the Rope Wrench to be in the optimum position. The rope wrench is compatible with CE EN1891 ropes up to 13mm diameter.

Certification CE EN12278

Available in 6 colours

EVO CHEST ASCENDER

The CT Evo aluminium chest ascender is light and compact and a perfect tool for access on ropes when combined with the right harness. The spring-loaded lever can be activated in a simple downwards movement, even while wearing gloves. The body of the ascender has been manufactured from aluminium and the cam and lever are manufactured from stainless steel for increased durability. The Evo has good grip (even with low loads) on wet and/or greasy ropes.

Certification CE EN12841

- Rope diameter: 10-13mm
- Static resistance: 6kN

Reference: 2BLCTB1N

STRYDER FOOT ASCENDER

The ISC Stryder aluminium foot ascender was developed to make climbing on ropes a lot easier. It provides smooth upwards movement on the rope, and can be opened and closed with use of the other foot. The foot strap is reinforced and it comes in right or left foot version.

- Rope diameter: 8-13mm
- Static resistance: 2.5kN
- Working load limit: 140kg

Reference: RBLI227A (right foot)

Reference: RBLI228A (left foot)

PLATFORM SAFETY KIT

CHEROKEE

EQUA S

MOKA

Reference: RELOLT04

CHEROKEE

The Cherokee polyamide full body harness is simple to adjust and adapts to all sizes. The user can connect themselves to the sternal or the dorsal attachment point.

AVANTAGES

- Non slip aluminium buckles
- Large sternal attachment
- Dorsal attachment
- Downwards strap adjustment
- One size fits all

Certification CE EN361

Reference: PPLSHRSG+

EQUA S

M'fix terminations on this lanyard guarantee maximum safety, and it is supplied as standard with a double lock snap hook for easy connection.

- Length: 135mm
- Width: 70mm
- Gate opening: 25mm
- Weight: 125gram
- Static resistance: 30kN

Certification CE EN354

CROSS PRO XL
RESCUE RED - OPEN

CROSS PRO 54L

The Cross Pro bag is the perfect solution to store and transport your precious equipment. It has the unique feature of totally opening up, to give you an overall view and full access to all your gear. The ergonomic shoulder straps and padded back make the Cross Pro also very comfortable to wear, and it comes in four exciting colour combinations.

KEY FEATURES

- Pack size: 54L
- Dimensions: 76x32x25cm
- High-resistance fabric 1680 D
- Heavy duty YKK zip closure & Velcro straps
- Bags from the Cross range can be attached to the front of the shoulder straps using special buckles

INTERIOR

- 6 modular mesh compartments at the sides
- The use of pop fasteners allows pockets to be made large or small
- Identification of pockets by pictogram style labels
- Storage can be customized as you wish
- 20 karabiner attachment points
- 2 adjustable buckle straps for securing ropes or a harness
- 1 organiser panel with elasticated webbing
- 2 semi-transparent pockets for documents
- 1 mesh compartment reachable by external zipper for your phone or other more fragile items

EXTERIOR

- 6 karabiner attachment points
- 4 high-resistance retainers (including two on the shoulder straps)
- 1 transparent pocket for documents and/or identification

- 1 helmet fastening kit, which also works for a helmet with visor & ear protection
- Padded back and adjustable padded shoulder straps for maximum comfort when transporting
- Option of adding the Cross Belt to the bag in order to distribute the weight on the body

PORTABILITY

- Comfortable and adjustable padded shoulder straps
- Two side handles (200kg resistance)
- Two central handles (200kg resistance)
- One back handle (200kg resistance)
- 1 Heli hoisting loop (300kg resistance)

CROSS PRO XL 75L

Following huge international demand, we have developed a new bag based on the revolutionary Cross Pro design but with even more storage space! Just like the Cross Pro, the XL version transforms into a quick to access highly organized equipment storage & transport bag. The Cross Belt allows the weight to be better distributed on the body for more comfort and comes standard with the Cross Pro XL. Currently available in Rescue Red.

KEY FEATURES

- Pack size: 75L
- Dimensions: 88x36x27cm
- High-resistance fabric 1680 D
- Heavy duty YKK zip closure & Velcro straps
- Bags from the Cross range can be attached to the front of the shoulder straps using special buckles

INTERIOR

- 6 modular mesh compartments at the sides
- The use of pop fasteners allows pockets to be made large or small
- Identification of pockets by pictogram style labels
- Storage can be customized as you wish
- 29 karabiner attachment points
- 2 adjustable buckle straps for securing ropes or a harness
- 1 organizer panel with elasticated webbing
- 2 semi-transparent pockets for documents

- 1 mesh compartment reachable by external zipper for your phone or other more fragile items
- Elasticated straps for holding different tools (for instance a hand saw)

EXTERIOR

- 5 karabiner attachment points
- 4 high-resistance retainers (including two on the shoulder straps)
- 1 transparent pocket for documents and/or identification
- 1 helmet fastening kit, which also works for a helmet with visor & ear protection
- Padded back and adjustable padded shoulder straps for maximum comfort when transporting
- 2 foldable pockets with elastic straps for water bottles or other items
- 1 reinforced pocket for glasses or phone storage

PORTABILITY

- Comfortable and adjustable padded shoulder straps
- 2 side handles (200 kg resistance)
- 2 central handles (200 kg resistance)
- 2 back handles (200 kg resistance)
- 1 Heli hoisting loop (300 kg resistance)

COLOURS

CROSS ROPE

The Cross Rope incorporates another unique rope bag design. The height can be adjusted according to the required volume of rope. It can comfortably be carried on your back or attached to the Cross Pro, the Cross Pro XL or the Dock by connecting it to the buckles on the shoulder straps. It comes in two vibrant colour combinations.

KEY FEATURES

- Pack size: 23L to 35L (expandable)
- Weight: 930gram
- Dimensions: (45+20)x32x19cm
- High-resistance fabric 1680 D
- Heavy duty YKK zip closure on the bottom and top
- Can be opened at both the top and bottom making it possible to change volume in seconds
- Can be attached to bags from the Cross range by the special buckles on the shoulder straps

OTHER FEATURES

- 6 karabiner attachment points
- Opening with YKK zipper for rope at the top
- Webbing with Velcro to attach the rope inside at the bottom
- Various carrying handles
- Mesh panels to allow ropes to dry

COLOURS

- Flash Lemon
Reference: PSCRBYA

DOCK

The Dock is a robust and comfortable equipment storage & transport bag designed with a clever system which allows the user to adapt it to the volume required. This is achieved by rolling the top of the bag and then closing the buckle, or the other way around to allow quick access to the inside of the bag. It comes in three exciting colour combinations.

KEY FEATURES

- Pack size: 60L
- Weight: 1.6kg
- Dimensions: 82x32x25cm
- High-resistance fabric 1680 D
- Heavy duty YKK zip closure & rolling top with buckle
- Bags from the Cross range can be attached to the front of the shoulder straps using special buckles

INTERIOR

- 1 large main storage space
- Stiffened back and 2 stiff straps to keep it standing up
- 3 karabiner attachment points
- 1 small semi-transparent document pocket

EXTERIOR

- 10 karabiner attachment points
- 2 equipment loops
- 2 foldable pockets with elastic straps for water bottles or other items
- 1 semi-transparent pocket for identification
- Various carrying handles
- Ventilation point

CARGO

This simple but very robust bag is highly resistant to friction and tear. The bottom is reinforced and has ventilation points. The flap has two transparent pockets with Velcro closing and it comes in three eye-catching colour combinations.

KEY FEATURES

- Pack size: 40L / 50L
- Dimensions 40L: 48x30x28cm
- Dimensions 50L: 56x30x28cm
- Highly resistant to friction and tear material
- Ergonomic carrying handle
- 6-point gear holder

- Size: 40L
 - Colour: Yellow
- Reference: PPLSSC42

- Size: 50L
 - Colour: Blue
- Reference: PPLSSC75

- Size: 50L
 - Colour: Red
- Reference: PSCCAR5A

HOST

This bag has been designed for the storage and transportation of ropes. It can contain 60m of climbing or access rope and 45m of rigging rope. Ropes can be stored even when wet thanks to the generous ventilation panels. It is equipped with stiffeners which maintain the bags shape even when empty, which makes smooth rope handling possible.

KEY FEATURES

- Pack size: 36L
- Weight: 910gram
- Dimensions: (35+25)x32x25cm

- High-resistance fabric 1680 D
- Heavy duty fabric with toggle closing system on the top
- Can be attached to bags from the Cross range using the special buckles on the shoulder straps

OTHER FEATURES

- 8 karabiner attachment points
- 4 separate gear loops
- Expandable pocket on the outside
- Webbing with Velcro to attach the rope inside at the bottom
- Transparent pocket for paperwork or identification
- Removable shoulder strap for carrying
- Mesh panels to allow ropes to dry

Colour

- Flash Lemon
- Reference: PSECBYA

CROSS ROPE LIGHT

This lightweight bag can hold 80m of 10.5mm rope. It can be attached to the inside of the Cross Pro and Cross Pro XL bags. Because half the bag is manufactured using mesh material it allows wet ropes to dry quickly.

KEY FEATURES

- Opens on both ends
- Side carrying handle
- Half mesh for better ventilation

Colour

- Black
- Reference: PPLSSCLCE

CROSS BELT

The Cross Belt is a wide padded waist belt which can be purchased separately. It helps to distribute the load on the body for greater comfort. The Cross Belt can be attached to the Cross Pro and the Dock bags. It comes as standard on the Cross Pro XL.

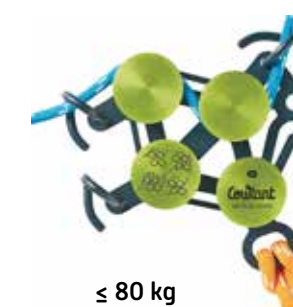

Colour

- Black

LOWERING

LOWERING DEVICE

≤ 80 kg

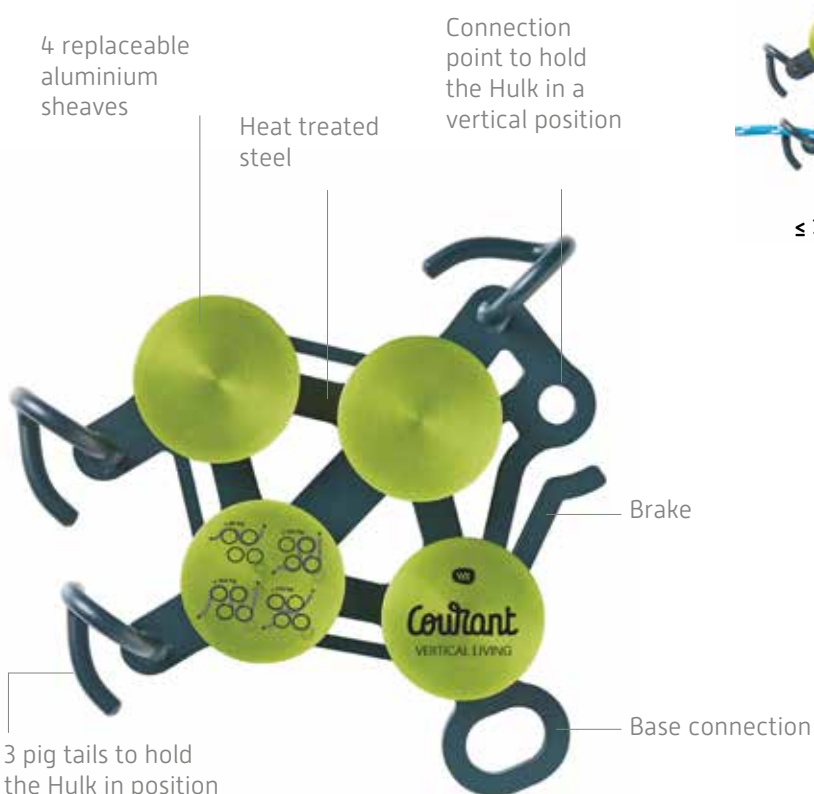

≤ 150 kg

≤ 300 kg

≤ 500 kg

HULK

The Hulk is an innovative floating lowering device designed to improve your lowering capabilities. The steel frame makes it robust and hard wearing, where the aluminium sheaves minimize rope wear and therefore increase the life of your rigging ropes. Using different setup options you can easily adjust the friction on the rope according to your needs, It can accommodate loads from 10kg to a maximum working load limit of 500kg.

KEY FEATURES

- Easy to handle, robust and innovative
- Smooth, controlled descent of branches and logs
- Can handle loads ranging from 10 to 500kg
- Eliminates rope twist and rope on rope wear
- The sheaves can be turned to evenly distribute the wear and are fully replaceable

- Static resistance: 25kN
- Working load limit: 5kN
- Maximum rope diameter: 14mm

Reference: RELOFRHA

RIGGING ROPES & SLINGS

MAONA

The 24-strand polyester double braid Maona rigging ropes have been specifically designed for all kinds of rigging and lowering operations, where smooth running through lowering devices and rigging pulleys, without the rope gaining too much torsion is important. Splicing is easily achieved because of the double braid construction. In order to easily identify the right rope for your job each diameter has its own specific colour.

- Diameter: 12mm
- Colour: Blue
- Mass per meter: 112gram
- Static resistance: 40kN
- Working load limit: 5.7kN

Reference: MHD++RBC++

- Diameter: 14mm

Splice

YAGAN SLING

A versatile rigging sling made from Maona rope. Available in several diameters and a number of standard lengths. These slings are used to connect lowering devices and pulleys with a suitable

hitch, firmly onto the branch or base of the tree.

- Available in 12, 14, and 16mm diameter, in 3 and 4m length
- 16mm diameter is also available in 5m length

Reference : RELOEL+++

SOUNA SLING

A versatile hollow braid sling suited for rigging or rope redirection in combination with a pulley or karabiner. The sling has a large loop on one end and a small one on the opposite end.

- Length: 130cm
- Static resistance: 16kN
- Working load limit: 10kN

Reference: RELOEV13
Supplied in a pack of 5

CORE

Courant steel D-shape triple lock karabiner with large opening.

Certification CE EN362

- Length: 128mm
- Width: 71mm
- Gate opening: 31mm
- Weight: 321gram
- Static resistance: 60kN

Reference: RMQU2198

VICTO

Courant steel HMS triple lock karabiner. Ideal for anchoring and rigging.

Certification CE EN362

- Length: 110mm
- Width: 67mm
- Gate opening: 21mm
- Weight: 234gram
- Static resistance: 50kN

Reference: RMQUS958

RIGGING PULLEYS

BLOCKBUSTER COMPACT

The ISC Blockbuster Compact offers an impressive strength to weight ratio. The side plates are made from hot forged aluminium which gives this compact pulley such great strength and load bearing capacity. The pulley is ideally suited for small rigging operations.

- Max rope diameter: 13mm
- Max sling diameter: 16mm
- Length: 125mm
- Width: 76mm
- Rigging sling diameter: 14 to 16mm
- Rigging rope diameter: 12mm
- Colour: Green
- Weight: 490gram
- Static resistance: 85kN
- Working load limit: 17kN

Reference: RPLIP048

Certification: CE EN12278

BLOCKBUSTER SMALL

The ISC Blockbuster Small is manufactured from high quality materials and using hot forged aluminium technology. This method of manufacture ensures an extremely robust and durable pulley perfectly capable of withstanding high impact forces. The rounded edges are not only aesthetically pleasing but also kind to your rigging ropes.

- Max rope diameter: 16mm
- Max sling diameter: 25mm
- Length: 190mm
- Width: 99mm
- Rigging sling diameter: 16 to 20mm
- Rigging rope diameter: 14 to 16mm
- Colour: Red
- Weight: 1490gram
- Static resistance: 100kN
- Working load limit: 20kN

Reference: RPLIP051

Certification: CE EN12278

BLOCKBUSTER MEDIUM

Same as the ISC Blockbuster Small pulley but bigger in size & capacity.

Certification: CE EN12278

- Max rope diameter: 19 mm
- Max sling diameter: 29 mm
- Length: 230mm
- Width: 124mm
- Rigging sling diameter: 20mm
- Rigging rope diameter: 16 to 18mm
- Colour: Blue
- Weight: 2300gram
- Static resistance: 150kN
- Working load limit: 30kN

Reference: RPLIP055

SMALL SINGLE PULLEY

This small ISC aluminium single pulley is both lightweight and robust. The pulley wheel runs on a self-lubricated bushing. The wide connector hole allows two karabiners to be attached.

- Static resistance: 40kN
- Maximum rope diameter: 13mm

Certification CE EN12278

Reference: RPLI11BK

SMALL DOUBLE PULLEY

This small ISC aluminium double pulley, is both lightweight and robust. The pulley wheels run on self-lubricated bushings. The wide connector hole allows two karabiners to be attached. The pulley has an additional connection point on the bottom to connect a karabiner and use it in a hauling system.

- Static resistance: 40kN
- Maximum rope diameter: 13mm

Certification CE EN12278

Reference: RPLI12BK

HAULING KIT

Multipurpose 4:1 mechanical advantage lifting and lowering kit. The system comes pre-rigged and ready for use and is supplied in an Airtex bag for easy transportation.

CONTAINS:

- 2x small double ball bearing pulleys
- 1x 8mm maillon rapide
- 1x Victo steel triple lock karabiner
- 1x Core steel triple lock karabiner
- 1x Phoenix 10mm hitch cord lanyard 70cm
- 1x Bandit 12.5mm diameter rope 12m length with stitched eye
- 1x Airtex bag

Reference: RELOKMOA

ROPEGRAB

This ISC Ropegrab is manufactured from high strength aluminium and has a non-aggressive cam design to prevent rope damage. It has a Pip Pin Axle, allowing the rope grab to be easily and securely attached onto a (working) rope or lanyard at any point. The Pip Pin is a special 'push-button' system, which

allows the user to quickly and efficiently secure the device before each use.

Size S

- Rope diameter: 10.5 to 13mm
- Weight: 177gram

Reference: RPLIP203

Size L

- Rope diameter: 14 to 16mm
- Weight: 300gram

Certification CE EN353-2

Reference: RPLIP204

FLASH CODE BEACON

These flashing beacons increase your visibility while working on roadsides, especially during early morning, late afternoon and/or bad weather conditions.

KEY FEATURES

- Highly visible
- Waterproof, easy to use and maintain
- Shock resistant & crushproof (can withstand being driven over by means of a car)
- Rechargeable using a 220V socket or 12V car cigarette socket
- Magnetic to attach the beacon to metal surfaces

- Small yellow accessory cord supplied for easy attachment to any object

- Colour: Green
